

AS 9120 CERTIFICATION APPROVAL

AS 9120 is the internationally recognized quality system standard specific to Stockists and Distributors. It is the quality system assuring quality in warehousing and distribution of aerospace parts. The standard meets the enhanced regulatory requirements to which aerospace distributors are subjected to.

AS 9120 is used by organizations that procure parts, materials, assemblies and sells these products to customers in the aerospace industry. This includes organizations that procure products and split them into smaller quantities.

Air Works India (Engineering) Pvt. Ltd. is in the process of obtaining AS 9120 certification approval for its newly established entity M/s. Airworks Aircraft parts Distributor (AAD) to support a major OEM.

Airworks Aircraft parts Distributor (AAD) is a sub-division of Air Works CMRO vertical of the parent organization Air Works India (Engineering) Pvt Ltd. AAD is located within the premises of Air Works CMRO at Hosur.

Benefits of Certification:

- Minimize business risks including regulatory risks and potential legal liabilities.
- Deliver products that consistently meet customer requirements.
- Get a listing in the Online Supplier Information System (OASIS) database. (We are already listed for our EN 9110: 2016 certification approval).
- Greater consistency and traceability of products and services, means problems are easier to avoid and rectify.
- Improvement of processes and operational efficiencies means money saved.
- Become a preferred supplier and gain customer and stakeholder trust.
- Continually improve and win more business in domestic and international markets
